Bob Ross and Chill? : Hello friends! Vreal now supports Tilt Brush. After you're done hanging out with all the happy little trees, we've got lots for you to look forward to! In the next update, everyone(!!!) will be able to make VR content with our app for certain titles (including Tilt Brush). We're aiming to add another game you can watch, too. While you're waiting to make VR recordings with our app, try pulling out a camera inside a Tilt Brush recording and take a selfie! :D Please continue to let us know what games you want to see; we're reading every comment and are evaluating new VR titles to add to the platform. Likewise, if you have suggestions for the app, leave a comment here or head over to . See below for the latest updates and known issues. If you have questions about how Vreal mods Tilt Brush, visit our FAQ on this page. [vreality.atlassian.net]

Updates: Tilt Brush is now supported! Everyone can watch Tilt Brush recordings. All approved content creators can record Tilt Brush recordings if you have Tilt Brush installed through Steam. If you want to try using 2D cameras inside a Tilt Brush recording, pull up the menu and select Selfie cam. Press the button to flip the camera around and take a selfie. Photos are saved in your pictures library on your desktop. Fixed a bug where you couldn't hear someone in your party the larger your party got. Now you can solidly hear five people in a party together. HOORAY! Known Issues: While in Early Access, Vreal is not yet optimized for disk usage or bandwidth consumption. If you are bandwidth or disk space challenged, you may wish to wait for our 1.0 release. Performance sometimes drops while watching a Tilt Brush recording on machines that run near the minimum spec recommended for VR. Some brushes don't display their glow and particle effects properly when displayed through a camera. Our most up-to-date list of known issues can be found on our user wiki. [vreality.atlassian.net] As always, we recommend joining our Discord [discord.gg] to party up with friends..

Introducing Likes and Dislikes : Hello there! We've implemented a new feature for you today! You can now like (YAY!) or dislike (BOO!) recordings in Vreal. Right now, we're showing a single aggregate number of both likes and dislikes for each recording. You'll also notice that we removed the pre-loading screen. Now you can get to watching content faster than ever. HUZZAH! An updated list of known issues can be found on our user wiki, here [vreality.atlassian.net] . We'd love to know what you think of the latest updates. Drop us a comment or join our Discord [discord.gg] ..

Now supporting Totally Accurate Battle Simulator (TABS); our first non-VR game! : Are you TOTALLY prepared for the news we have to share? Would it be ACCURATE to say you're sick of all the puns we are always sharing? Well, we hope you're ready for BATTLE because we can't stop won't stop. It may seem like we're just pun robots, but we promise this isn't a SIMULATOR. Okay okay, enough of that. Big news today! Vreal has added our first ever non-VR game: Totally Accurate Battle Simulator (TABS) from developers Landfall. TABS is currently in Early Access on Steam. This game is incredibly fun to play, from the campaigns to the units to the maps, it's full of character that is unforgettable. Before you alt-tab away, there's a couple things you should know. TABS content is only available to watch in desktop mode, as it's not a VR game. Updates: Support for our first non-VR title, Totally Accurate Battle Simulator, is now live! You can now switch between VR and Desktop mode without ever closing the Vreal app. We now highlight popular content, based on when it was posted, views and hearts the content has received. Popular content is displayed with a fire icon. If you have any questions, or if you want to suggest a new feature, head over to .

Known Issues: When watching in a party, all members will be forced to watch in 2D Only single-level commenting is currently supported (nested replies and deletion are coming in the future) We're still adjusting the popular content algorithm, so you may see that changing a bit in the next couple weeks. An updated list of known issues can be found on our user wiki, here [vreality.atlassian.net] ..

Now supporting Eleven: Table Tennis : Greetings! It's a sunny Wednesday afternoon, and you've just played a terrible an amazing table tennis match in VR. It was such a disaster great match that you want to watch it over and over again. How are we gonna do that? Wellll step right up! Vreal just added support for Eleven: Table Tennis . You can now challenge your friends in what is dubbed as the ultimate table tennis simulator game and then taunt your friends relive the match in all its glory. We've also updated the likes and dislikes icons, and numbers are calculated and displayed separately. You might also notice that the featured content carousel got a visual overhaul. If you have any questions, or if you want to suggest a new feature, head over to .

If you're looking for a rad group of VR enthusiasts and content creators, join our Discord [discord.gg] . In the meantime, the latest known issues can be found on our user wiki, here [vreality.atlassian.net] ..

Now Supporting Mosh Pit Simulator : Howdy folks! We've added a new VR game for you! Since Mosh Pit Simulator launched in late January, we got a lot of requests to add this beautifully bizarre and weirdly wonderful VR game to Vreal. We can't wait to see what you do with this one! You'll need to own Mosh Pit Simulator on Steam, then mod it in Vreal in order to make content. Comment below if you've made a recording and we'll check it out! :D

Additional updates & bug fixes: The bangles signifying party member status (leader or otherwise) are now rendering at the expected size. In desktop mode, the recording button was briefly interactable after initially launching the app. We've fixed this since recording content is only available in VR mode. Lots of behind the scenes architecture updates that will eventually allow us to turn around updates much faster. An updated list of known issues can be found on our user wiki, here [vreality.atlassian.net] . We appreciate your support! If you have any questions, or if you want to suggest a new game for us, or if you have an excellent feature idea, head over to .
